DETAILED ACTION***Election of Species***

1. This application contains claims directed to the following patentably distinct species of the claimed invention. Claim 19 recites various species of bupropion metabolites and claim 128 also recites a patentably distinct specie, (S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol. As evidenced by applicant's own remarks, each metabolite is patentably distinct, see remarks filed 3/26/04 at page 5(A section). For instance, US6391875 teaches (S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol and the same species were included in the original claim 19(before amended). Applicant deleted the said specie from amended claims to overcome the rejection and the said species is now included in independent claim 123. Applicant further allegedly states that US6391875 teaches away from the instantly amended claims because US'875 reported that "(S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol does not show toxic effects that is associated with other metabolites", see remarks at page 6 (4th paragraph). Since applicant disapproves the substitution of (S,S)-2-(3-chlorophenyl)-2-hydroxy-3,5,5-trimethyl-morphinol with other species, the patentably distinctiveness between each species was self evidenced by the instant claim 19 and claim 123.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 1618

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. **Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.**

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Conclusion

1. It is noted that the restriction requirement is necessitated by amendment filed 3/26/04.

Art Unit: 1618

2. 37 CFR 1.142(a), second sentence states: " if the distinctness and independence of the invention is clear, such requirement will be made before any action upon the merits however, it may be made at any time before final action in the case at the discretion of the examiner.". Thus, the instant restriction requirement is considered to be proper in timely manner.

3. No claim is allowed.

4. All pending claims are subject to supplemental restriction/election requirement.
